Builders and Owners of Fireplace Chimneys

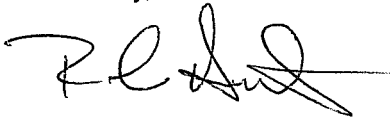

Dear Sir or Madam:

It is with great pleasure that I write to you about a wonderful new product on the market. We at Simonini Builders of SC, Inc. have begun to use Chimney Pots made from GFRC and produced by Stonecasting of Charleston, SC.

Over our last 5 projects we have used approximately one dozen of these newly designed chimney pots in various shapes and sizes. We first decided to use these new pots because of the decreased weight which would allow us to carry the pots up the roof without the expense and hassle of a crane. What we found is that not only do we save because of the weight aspect but we also have a more authentic, hand made pot that our customers and Architectural Review Board appreciate.

We are very hesitant as a company to be the guinea pig for new products. With this chimney pot we felt very comfortable due to all the other products from Stonecasting that we have used in Charleston over the last 8 years. We look forward to our continued relationship with Stonecasting and the use of all their products including their new chimney pots.

Sincerely,

Rob Hutzler  
Estimating and Purchasing Manager
